

HIGHLIFTER

Why
LOGITRANS?

logitrans.com

Less sick days

The ergonomic design reduces sick days and gives happier employees.

Higher efficiency and long lifetime

The unique designed construction of the highlifter will increase the efficiency in production or stock.

Lowers maintenance cost with use of quality materials and has a reliable cylinder construction.

All will be tested before shipment.

Safety

With brake on tandem wheels and supporting feet at steering wheels, the construction is locked in order to lower risk of work accidents.

Furthermore, it has foot protection and central location of control buttons.

Flexibility

- Different fork lengths and widths.
- Tailor-made solutions.
- Available in Inox and Inox Plus versions.
- Available with Level- and Remote Control
